1982 Journal of Energy Index

How to Use the Index

In the Subject Index, pages 442-444, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 445, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 446-448, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1982, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Design and Development of the Combustor Diffuser for NASA/GE Energy Efficient Engine **E82-045**

Avionics Systems

Integrated Control Techniques for Advanced Aircraft Electrical Power Systems **E82-010**

Civil Missions and Transportation

Power System Design for an All-Electric Airplane **E82-011**

Fuels and Fuel Systems

Mobil Methanol-to-Gasoline Process **E82-058**

Airblast Atomization: Studies on Drop-Size Distribution **E82-055**

Effect of Horizontal Air Jet Penetration on the Combustion of Coal in a Fluidized Bed **E82-023**

Powerplant Design

Effect of Horizontal Air Jet Penetration on the Combustion of Coal in a Fluidized Bed **E82-023**

Jet Engine Integrated Generator **E82-008**

Advantages of Permanent Magnet VSCF Generating Systems on Aircraft Fuel Economy **E82-006**

Propeller and Rotor Systems

Dynamic Rotor Loads of a Wind Turbine via Hand-Held Calculators **E81-021**

Subsystem Design

Power System Design for an All-Electric Airplane **E82-011**

Integrated Control Techniques for Advanced Aircraft Electrical Power Systems **E82-010**

Application of a Microprocessor for Aircraft Electrical Generator Control and Protection **E82-009**

Jet Engine Integrated Generator **E82-008**

Advantages of Permanent Magnet VSCF Generating Systems on Aircraft Fuel Economy **E82-006**

Energy

Alternate Fuels

Developing Technologies for Synthetic Fuels **E82-073**

Approach to Nitinol Power Plant Cost Analysis **E82-071**

Impacts of Broadened-Specification Fuels on Aircraft Turbine Engine Combustors **E82-070**

Mobil Methanol-to-Gasoline Process **E82-058**

Airblast Atomization: Studies on Drop-Size Distribution **E82-055**

A Spark Ignition Model for Liquid Fuel Sprays Applied to Gas Turbine Engines **E82-044**

Cyclocentrifuge™: Advanced Gas/Solids Separator for Coal Conversion Processes **E82-043**

Solar Energy: When, Where, How? **E82-037**

Optimization of Fuel Composition in Open-Cycle Magnetohydrodynamic Power Generation **E82-027**

Tensile Strengths of Colorado and Utah Oil Shales **E82-015**

Batteries

Fuel Property Effects on Air Force Gas Turbine Engines---Program Genesis **E82-068**

Sodium-Sulfur-Aluminum Chloride Cells **E82-016**

Optimization Studies of Lithium/Metal Sulfide Cells for Electric Vehicle Applications **E82-014**

Nickel-Hydrogen Battery Technology - Development and Status **E82-005**

Biomass

Solar Energy: When, Where, How? **E82-037**

Combustion

Characteristic Time Ignition Model Extended to an Annular Gas Turbine Combustor **E82-081**

Performance Predictions for Confined Swirling Flows **E82-078**

Fuel Property Effects on Air Force Gas Turbine Engines---Program Genesis **E82-068**

Three-Dimensional Model of Spray Combustion in Gas Turbine Combustors **E82-067**

Prediction of the Flow, Reaction, and Heat Transfer in a Glass Furnace **E82-065**

The Role of Centrifugal Force Fields in the Stabilization of Swirling Flames **E82-060**

Calculations of Magnetohydrodynamic Swirl Combustor Flowfields **E82-048**

Design and Development of the Combustor Diffuser for NASA/GE Energy Efficient Engine **E82-045**

Design and Development of the Combustor Diffuser for NASA/GE Energy Efficient Engine **E82-045**

A Spark Ignition Model for Liquid Fuel Sprays Applied to Gas Turbine Engines E82-044
Effect of Horizontal Air Jet Penetration on the Combustion of Coal in a Fluidized Bed E82-023

Conservation

Performance Investigation of a Long, Slender Heat Pipe for Thermal Energy Storage Applications E82-066
Experimental Investigation of Closed Two-Phase Thermosyphons E82-046
Optimization Studies of Lithium/Metal Sulfide Cells for Electric Vehicle Applications E82-014

Cryogenics

High-Power-Density Superconducting Generator E82-007

Exploration and Recovery

H-Coal™ Processing of Kentucky No. 11 Coal E82-040

Geothermal

Approach to Nitinol Power Plant Cost Analysis E82-071
Ferroelectric Conversion of Heat to Electrical Energy---A Demonstration E82-017

Hydrogen and Unique Fuels

Mobil Methanol-to-Gasoline Process E82-058

Magnetohydrodynamics

End Region Effects Upon the Performance of a Magnetohydrodynamic Channel E82-080
Loading Schemes for a 50 MW_{th} Diagonally Connected MHD Generator E82-074
Formulation and Assessment of a Cross-Plane Electrical Model for Magnetohydrodynamic Channels E82-054
Plasma Diagnostics of Magnetohydrodynamic Generators E82-053
Performance Calculations for 1000 MW_e Magnetohydrodynamic/Steam Power Plants E82-052
Calculations of Magnetohydrodynamic Swirl Combustor Flowfields E82-048
Performance of MHD Generators with Electrode Current Control E82-042
U-25B Magnetohydrodynamic Generator: Comparison of Analysis with Experiment E82-041
Electrical Effects of Coal Slag in a Diffuse Mode Magnetohydrodynamic Generator E82-035
Power Conditioning and Control of Slagging MHD Generators E82-034
Investigative Data Analysis Technique for Magnetohydrodynamic Generators E82-033
Comparison of Experimental Results from the UTSI Coal-Fired MHD Generator to Theoretical Predictions E82-032
Experimental Results of the UTSI Coal-Fired MHD Generator E82-031
Simulated and Measured MHD Generator Performance E82-030
Preliminary Faraday Performance of a Large Magnetohydrodynamic Generator at High Magnetic Field E82-029
Optimization of Fuel Composition in Open-Cycle Magnetohydrodynamic Power Generation E82-027
Arc Mode Molten Seed Electrodes for MHD Power Generation E82-022
Analysis of Power Takeoff in Diagonal Conducting Wall Channels E82-018

Ocean Thermal

Approach to Nitinol Power Plant Cost Analysis E82-071

Ocean Wave and Tidal

Performance of the Wells Turbine at Starting E82-076
Theory and Performance of a Wells Turbine E82-028

Photovoltaic Power

Solar Cell Performance at Low Illumination and Temperature for Deep-Space Applications E82-077
High-Performance Photovoltaic Systems E82-039
Concentrating Photovoltaics: A Candidate for the Next Generation of Satellite Power Systems E82-020
Photocell Heat Engine Solar Power Systems E82-013
Factors Governing Photovoltaic Technology Transfer: Terrestrial to Space E82-003
High-Efficiency Spectrophotovoltaic System for Orbital Power Generation E82-002
Low-Cost, Space Shuttle Power Extension Package Solar Array Design E82-001

Power Conditioning

Frequency Converter Technology for Aircraft Power Systems E82-056
Integration Compatibility of Ion Engine Power Conditioner E82-049
Performance of MHD Generators with Electrode Current Control E82-042
Modular SCR Assemblies in VSCF Systems E82-038
Power Conditioning and Control of Slagging MHD Generators E82-034

Rotating Machinery

Performance of the Wells Turbine at Starting E82-076
Comparison of Advanced Engines for Parabolic Dish Solar Thermal Power Plants E82-050
Cyclocentrifuge™: Advanced Gas/Solids Separator for Coal Conversion Processes E82-043
Theory and Performance of a Wells Turbine E82-028
Jet Engine Integrated Generator E82-008
High-Power-Density Superconducting Generator E82-007
Advantages of Permanent Magnet VSCF Generating Systems on Aircraft Fuel Economy E82-006

Solar Power Satellites

Concentrating Photovoltaics: A Candidate for the Next Generation of Satellite Power Systems E82-020
High-Efficiency Spectrophotovoltaic System for Orbital Power Generation E82-002

Solar Thermal Power

Simple Analysis of a Forced Flow Solar Regeneration System E82-079
Performance of a Matrix Air Heater E82-057
Comparison of Advanced Engines for Parabolic Dish Solar Thermal Power Plants E82-050
Solar Energy: When, Where, How? E82-037
Second-Generation Parabolic Trough Solar Energy Systems Optimization Analysis E82-026
Site-Specific Clear-Day Solar Irradiance Model from Long-Term Irradiance Data E82-021
Ferroelectric Conversion of Heat to Electrical Energy---A Demonstration E82-017
Photocell Heat Engine Solar Power Systems E82-013

Wind Power

Aerodynamic Loads and Performance of the Darrieus Rotor E82-072
Generalized Characteristics and Applicability of Various Probability Distributions for Wind Energy Applications E82-069
Performance of Tornado Wind Energy Conversion Systems E82-062
Effect of Wind Loading on the Design of a Kite Tether E82-059
Performance Assessment and Cost Effectiveness of Wing Energy Conversion Systems E82-019
Numerical Solution of Flow Near the Rotor of a Wind Turbine E82-012
Dynamic Rotor Loads of a Wind Turbine via Hand-Held Calculators E81-021

Fluid Dynamics

Boundary Layers and Convective Heat Transfer-Turbulent

Three-Dimensional Flow and Thermal Development in Magnetohydrodynamic Channels E82-036

Computational Methods

Generalized Characteristics and Applicability of Various Probability Distributions for Wind Energy Applications E82-069
Calculations of Magnetohydrodynamic Swirl Combustor Flowfields E82-048
Three-Dimensional Flow and Thermal Development in Magnetohydrodynamic Channels E82-036

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Numerical Solution of Flow Near the Rotor of a Wind Turbine E82-012

Multiphase Flows

Numerical Solution to Transonic Two-Phase Capillary Tube Flow E82-047

Nonsteady Aerodynamics

Massive Release of Gas from Long Pipelines E82-024

Nozzle and Channel Flow

End Region Effects Upon the Performance of a Magnetohydrodynamic Channel E82-080
Comparison of Experimental Results from the UTSI Coal-Fired MHD Generator to Theoretical Predictions E82-032
Massive Release of Gas from Long Pipelines E82-024

Plasmadynamics and MHD

End Region Effects Upon the Performance of a Magnetohydrodynamic Channel **E82-080**
Formulation and Assessment of a Cross-Plane Electrical Model for Magnetohydrodynamic Channels **E82-054**
Plasma Diagnostics of Magnetohydrodynamic Generators **E82-053**
Performance Calculations for 1000 MW_e Magnetohydrodynamic/Steam Power Plants **E82-052**
Performance of MHD Generators with Electrode Current Control **E82-042**
U-25B Magnetohydrodynamic Generator: Comparison of Analysis with Experiment **E82-041**
Three-Dimensional Flow and Thermal Development in Magnetohydrodynamic Channels **E82-036**
Power Conditioning and Control of Slagging MHD Generators **E82-034**
Comparison of Experimental Results from the UTSI Coal-Fired MHD Generator to Theoretical Predictions **E82-032**
Experimental Results of the UTSI Coal-Fired MHD Generator **E82-031**
Simulated and Measured MHD Generator Performance **E82-030**
Preliminary Faraday Performance of a Large Magnetohydrodynamic Generator at High Magnetic Field **E82-029**
Analysis of Power Takeoff in Diagonal Conducting Wall Channels **E82-018**

Reactive Flows

The Role of Centrifugal Force Fields in the Stabilization of Swirling Flames **E82-060**

Viscous Nonboundary-Layer Flows

Numerical Solution to Transonic Two-Phase Capillary Tube Flow **E82-047**

Interdisciplinary Topics

Aerospace Technology Utilization

Earth Radiation Budget Experiment (ERBE): An Overview **E82-025**

Analytical and Numerical Methods

U-25B Magnetohydrodynamic Generator: Comparison of Analysis with Experiment **E82-041**
Electrical Effects of Coal Slag in a Diffuse Mode Magnetohydrodynamic Generator **E82-035**
Simulated and Measured MHD Generator Performance **E82-030**
Tensile Strengths of Colorado and Utah Oil Shales **E82-015**

Zwick, S. A., E82-054

Chronological Index

E81-021 Dynamic Rotor Loads of a Wind Turbine via Hand-Held Calculators. F. S. Stoddard, *Consultant* (JE **5**, 2, p. 99) Article based on AIAA Paper 80-0611 CP803
Technical Comment by Andrzej Wortman (JE **6**, 5, p. 351)
Reply (JE **6**, 5, p. 352)

E82-001 Low-Cost, Space Shuttle Power Extension Package Solar Array Design. Clint J. Souza, *Lockheed Missiles & Space Company, Inc.* (JE **6**, 1, p. 4) Article based on AIAA Paper 80-9485

E82-002 High-Efficiency Spectrophotovoltaic System for Orbital Power Generation. Joan R. Onffroy, David E. Stoltzmann, Ray J. H. Lin and Gary R. Knowles, *Honeywell* (JE **6**, 1, p. 8) Article based on AIAA Paper 80-9071

E82-003 Factors Governing Photovoltaic Technology Transfer: Terrestrial to Space. John Scott-Monck and Paul Stella, *Jet Propulsion Laboratory, California Institute of Technology* (JE **6**, 1, p. 16) Article based on AIAA Paper 80-9070

E82-004 Unique Features and Spacecraft Applications of Dynamic Isotope Power Systems. Bernard Raab, *Fairchild Space & Electronics Company* (JE **6**, 1, p. 20) Article based on AIAA Paper 80-9201

E82-005 Nickel-Hydrogen Battery Technology - Development and Status. J. D. Dunlop and J. F. Stockel, *COMSAT Laboratories* (JE **6**, 1, p. 28) Article based on AIAA Paper 80-9381

E82-006 Advantages of Permanent Magnet VSCF Generating Systems on Aircraft Fuel Economy. James J. O'Neill, *General Electric Company* (JE **6**, 1, p. 34) Article

E82-007 High-Power-Density Superconducting Generator. B. B. Gamble and T. A. Keim, *General Electric Company* (JE **6**, 1, p. 38) Article based on AIAA Paper 80-9083

E82-008 Jet Engine Integrated Generator. E. Richter and T. W. Neumann, *General Electric Company* (JE **6**, 1, p. 45) Article based on AIAA Paper 80-9079

E82-009 Application of a Microprocessor for Aircraft Electrical Generator Control and Protection. Patrick J. Leong, Ishaque S. Mehdi and Teddy R. Thomas, *Boeing Military Airplane Company* (JE **6**, 1, p. 49) Article based on AIAA Paper 80-9082

E82-010 Integrated Control Techniques for Advanced Aircraft Electrical Power Systems. Duane G. Fox, *Air Force Wright Aeronautical Laboratories* (JE **6**, 1, p. 54) Article based on AIAA Paper 80-9080

E82-011 Power System Design for an All-Electric Airplane. Eldon T. Reiquam, *Boeing Military Airplane Company* (JE **6**, 1, p. 59) Article based on AIAA Paper 80-9081

E82-012 Numerical Solution of Flow Near the Rotor of a Wind Turbine. Joseph A. Schetz and Reginald L. Figard, *Virginia Polytechnic Institute and State University* (JE **6**, 2, p. 65) Article based on AIAA Paper 80-0608 CP803

E82-013 Photocell Heat Engine Solar Power Systems. R. T. Taussig, T. S. Vaidyanathan, S. Hoverson and C. Bruzzone, *Mathematical Sciences Northwest, Inc.*; and W. Christiansen, *University of Washington* (JE **6**, 2, p. 71) Article based on AIAA Paper 80-9025

E82-014 Optimization Studies of Lithium/Metal Sulfide Cells for Electric Vehicle Applications. E. C. Gay, W. E. Miller and F. J. Martino, *Argonne National Laboratory* (JE **6**, 2, p. 76) Article based on AIAA Paper 80-9043

E82-015 Tensile Strengths of Colorado and Utah Oil Shales. Ken P. Chong, *University of Wyoming;* John Ward Smith, *Consultant;* and Eric S. Borgman, *University of Wyoming* (JE **6**, 2, p. 81) Article based on AIAA Paper 80-9056

E82-016 Sodium-Sulfur-Aluminum Chloride Cells. J. J. Auborn and S. M. Granstaff Jr., *Bell Laboratories* (JE **6**, 2, p. 86) Article based on AIAA Paper 80-9108

E82-017 Ferroelectric Conversion of Heat to Electrical Energy---A Demonstration. Randall B. Olsen, *Power Conversion Technology, Inc.* (JE **6**, 2, p. 91) Article based on AIAA Paper 80-9311

E82-018 Analysis of Power Takeoff in Diagonal Conducting Wall Channels. S. Kuo and E. Levi, *Polytechnic Institute of New York* (JE **6**, 2, p. 96) Article

E82-019 Performance Assessment and Cost Effectiveness of Wing Energy Conversion Systems. Gabriel Miller, Martin Hoffert and Dean Corren, *New York University* (JE **6**, 2, p. 104) Article

E82-020 Concentrating Photovoltaics: A Candidate for the Next Generation of Satellite Power Systems. Jack W. Geis, *AFWAL/POOC* (JE **6**, 2, p. 109) Article based on AIAA Paper 80-9073

E82-021 Site-Specific Clear-Day Solar Irradiance Model from Long-Term Irradiance Data. Sheldon M. Jeter and Cung N. Phan, *Georgia Institute of Technology* (JE **6**, 2, p. 115) Article

E82-022 Arc Mode Molten Seed Electrodes for MHD Power Generation. Sadayoshi Korenaga, Hiroyuki Imai and Toshihisa Masuda, *Electrotechnical Laboratory (Japan)* (JE **6**, 2, p. 119) Article

E82-023 Effect of Horizontal Air Jet Penetration on the Combustion of Coal in a Fluidized Bed. S. Rajan and J. D. Christoff, *Southern Illinois University* (JE **6**, 2, p. 125) Article

E82-024 Massive Release of Gas from Long Pipelines. T. K. Fannelop, *Norwegian Institute of Technology*; and I. L. Ryhming, *Swiss Federal Institute of Technology* (JE **6**, 2, p. 132) Article

E82-025 Earth Radiation Budget Experiment (ERBE): An Overview. B. R. Barkstrom and J. B. Hall Jr., *NASA Langley Research Center* (JE **6**, 2, p. 141) Article based on AIAA Paper 80-1951

E82-026 Second-Generation Parabolic Trough Solar Energy Systems Optimization Analysis. Ralph R. Peters, *Sandia National Laboratories* (JE **6**, 2, p. 147) Article

E82-027 Optimization of Fuel Composition in Open-Cycle Magnetohydrodynamic Power Generation. Christopher F. Harris, *University of Dayton*; and Allan S. Myerson, *Georgia Institute of Technology* (JE **6**, 2, p. 155) Technical Note

E82-028 Theory and Performance of a Wells Turbine. S. Raghunathan, C. P. Tan and N. A. J. Wells, *Queen's University of Belfast* (JE **6**, 2, p. 157) Technical Note

E82-029 Preliminary Faraday Performance of a Large Magnetohydrodynamic Generator at High Magnetic Field. R. F. Starr, L. S. Christensen, G. W. Garrison and G. L. Whitehead, *Arvin/Calspan Field Services, Inc.* (JE **6**, 3, p. 163) Article

E82-030 Simulated and Measured MHD Generator Performance. Z. El Derini and Ezzat D. Doss, *Argonne National Laboratory* (JE **6**, 3, p. 171) Article based on AIAA Paper 81-0029

E82-031 Experimental Results of the UTSI Coal-Fired MHD Generator. F. L. Galanga, J. T. Lineberry, Y. C. L. Wu, M. H. Scott, W. E. Baucum and R. W. Clemons, *The University of Tennessee Space Institute* (JE **6**, 3, p. 179) Article based on AIAA Paper 81-0030

E82-032 Comparison of Experimental Results from the UTSI Coal-Fired MHD Generator to Theoretical Predictions. J. T. Lineberry, F. L. Galanga, B. L. Liu, Y. C. L. Wu and M. H. Scott, *The University of Tennessee*; Y. C. Pan and E. D. Doss, *Argonne National Laboratory* (JE **6**, 3, p. 187) Article based on AIAA Paper 81-0031

E82-033 Investigative Data Analysis Technique for Magnetohydrodynamic Generators. W. Unkel, J. A. Schwoerer, J. D. Teare and J. F. Louis, *Massachusetts Institute of Technology* (JE **6**, 3, p. 196) Article based on AIAA Paper 81-0174

E82-034 Power Conditioning and Control of Slagging MHD Generators. A. M. Demirjian and I. M. Quijano, *Avco Everett Research Laboratory, Inc.* (JE **6**, 3, p. 204) Article based on AIAA Paper 81-0246

E82-035 Electrical Effects of Coal Slag in a Diffuse Mode Magnetohydrodynamic Generator. R. M. Nelson, *Iowa State University*; and J. K. Koester, *Stanford University* (JE **6**, 3, p. 210) Article based on AIAA Paper 81-0176

E82-036 Three-Dimensional Flow and Thermal Development in Magnetohydrodynamic Channels. S. P. Vanka and R. K. Ahluwalia, *Argonne National Laboratory* (JE **6**, 3, p. 218) Article based on AIAA Paper 81-0247

E82-037 Solar Energy: When, Where, How?. K. J. Touryan, *Flow Industries* (JE **6**, 4, p. 227) Survey Paper

E82-038 Modular SCR Assemblies in VSCF Systems. John W. Butler, Homer Glascock and Raymond F. Dyer, *General Electric Company* (JE **6**, 4, p. 240) Article based on AIAA Paper 80-9084

E82-039 High-Performance Photovoltaic Systems. Henri J. R. Maget, *Varian Associates, Inc.* (JE **6**, 4, p. 245) Article based on AIAA Paper 80-9103

E82-040 H-Coal™ Processing of Kentucky No. 11 Coal. A. G. Comolli, P. Ganguli and M. Merdinger, *Hydrocarbon Research, Inc.* (JE **6**, 4, p. 249) Article based on AIAA Paper 80-9370

E82-041 U-25B Magnetohydrodynamic Generator: Comparison of Analysis with Experiment. E. D. Doss, B. F. Picologlou, Y. Pan and T. Petrie, *Argonne National Laboratory* (JE **6**, 4, p. 252) Article based on AIAA Paper 81-0032

E82-042 Performance of MHD Generators with Electrode Current Control. A. M. Demirjian and C. C. P. Pian, *Avco Everett Research Laboratory, Inc.* (JE **6**, 4, p. 261) Article based on AIAA Paper 81-0249

E82-043 Cyclocentrifuge™: Advanced Gas/Solids Separator for Coal Conversion Processes. J.T. McCabe and P. R. Albrecht, *Mechanical Technology Inc.* (JE **6**, 4, p. 266) Article based on AIAA Paper 81-0395

E82-044 A Spark Ignition Model for Liquid Fuel Sprays Applied to Gas Turbine Engines. J. E. Peters, *Purdue University;* and A. M. Mellor, *Purdue University* (JE **6**, 4, p. 272) Article

E82-045 Design and Development of the Combustor Diffuser for NASA/GE Energy Efficient Engine. P. E. Sabla and J. R. Taylor, *General Electric Company*; and D. J. Gauntner, *NASA Lewis Research Center* (JE **6**, 4, p. 275) Article

E82-046 Experimental Investigation of Closed Two-Phase Thermosyphons. Nguyen-Chi Hung, Manfred Groll and Dang-Van Thong, *Institut fur Kernenergetik und Energiesysteme, Universitat Stuttgart* (JE **6**, 4, p. 283) Technical Note based on AIAA Paper 79-1106

E82-047 Numerical Solution to Transonic Two-Phase Capillary Tube Flow. James J. Rizza, *California State University* (JE **6**, 4, p. 285) Technical Note

E82-048 Calculations of Magnetohydrodynamic Swirl Combustor Flowfields. A. K. Gupta, H. Khan and J. H. Beer, *Massachusetts Institute of Technology*; and D. G. Lilley, *Oklahoma State University* (JE **6**, 5, p. 289) Synoptic based on AIAA Paper 81-0044

E82-049 Integration Compatibility of Ion Engine Power Conditioner. K. Machida, Y. Toda, H. Murakami and I. Kudo, *Electrotechnical Laboratory (Japan)* (JE **6**, 5, p. 291) Synoptic based on AIAA Paper 81-0691

E82-050 Comparison of Advanced Engines for Parabolic Dish Solar Thermal Power Plants. T. Fujita, J. M. Bowyer and B. C. Gajanana, *Jet Propulsion Laboratory, California Institute of Technology* (JE **6**, 5, p. 293) Article based on AIAA Paper 80-9347

E82-051 High-Temperature Heat Pipes for Waste-Heat Recovery. M. A. Merrigan and E. S. Keddy, *Los Alamos National Laboratory* (JE **6**, 5, p. 298) Article based on AIAA Paper 80-1505

E82-052 Performance Calculations for 1000 MW_e Magnetohydrodynamic/Steam Power Plants. C. C. P. Pian, P. J. Staiger and G. R. Seikel, *NASA Lewis Research Center* (JE **6**, 5, p. 304) Article based on AIAA Paper 80-0320

E82-053 Plasma Diagnostics of Magnetohydrodynamic Generators. A. M. Demirjian, *Avco Everett Research Laboratory, Inc.* (JE **6**, 5, p. 310) Article based on AIAA Paper 81-0099

E82-054 Formulation and Assessment of a Cross-Plane Electrical Model for Magnetohydrodynamic Channels. R. K. Ahluwalia, S. P. Vanka, K. H. Im and S. A. Zwick, *Argonne National Laboratory* (JE **6**, 5, p. 314) Article based on AIAA Paper 81-0175

E82-055 Airblast Atomization: Studies on Drop-Size Distribution. N. K. Rizk, *Cairo University*; and A. H. Lefebvre, *Purdue University* (JE **6**, 5, p. 323) Article based on AIAA Paper 81-0263

E82-056 Frequency Converter Technology for Aircraft Power Systems. William McMurray, *General Electric Company* (JE **6**, 5, p. 328) Article

E82-057 Performance of a Matrix Air Heater. M. S. Sodha, N. K. Bansal, D. Singh and S. S. Bharadwaj, *Indian Institute of Technology* (JE **6**, 5, p. 334) Article

E82-058 Mobil Methanol-to-Gasoline Process. David Liederman, Sergei Yurchak, James C. W. Kuo and Wooyoung Lee, *Mobil Research and Development Corporation* (JE **6**, 5, p. 340) Technical Note based on AIAA Paper 80-9309

E82-059 Effect of Wind Loading on the Design of a Kite Tether. Sanjeev K. Varma and J. S. Goela, *Indian Institute of Technology* (JE **6**, 5, p.342) Technical Note

E82-060 The Role of Centrifugal Force Fields in the Stabilization of Swirling Flames. N. Syred, T. C. Claypole and A. C. Styles, *University College Cardiff (Great Britain)* (JE **6**, 5, p. 344) Technical Note based on AIAA Paper 81-0105

E82-061 Generalized Stability Criteria for an Opposed-Jet Flameholder. R. E. Peck, *University of Kentucky*; and G. S. Samuelsen, *University of California* (JE **6**, 5, p. 346) Technical Note

E82-062 Performance of Tornado Wind Energy Conversion Systems. Tyler Volk, *New York University* (JE **6**, 5, p. 348) Technical Note

E82-065 Prediction of the Flow, Reaction, and Heat Transfer in a Glass Furnace. A. D. Gosman, F. C. Lockwood, I. E. A. Megahed and N. G. Shah, *Imperial College of Science and Technology (England)* (JE **6**, 6, p. 353) Article based on AIAA Paper 80-0016

E82-066 Performance Investigation of a Long, Slender Heat Pipe for Thermal Energy Storage Applications. A. Abhat, *Universitat Stuttgart (FRG)* (JE **6**, 6, p. 361) Article based on AIAA Paper 80-1509

E82-067 Three-Dimensional Model of Spray Combustion in Gas Turbine Combustors. F. Boysan, W. H. Ayers, J. Swithenbank and Z. Pan, *University of Sheffield (Great Britain)* (JE **6**, 6, p. 368) Article based on AIAA Paper 81-0324

E82-068 Fuel Property Effects on Air Force Gas Turbine Engines---Program Genesis. T. A. Jackson, *Air Force Wright Aeronautical Laboratories* (JE **6**, 6, p. 376) Article

E82-069 Generalized Characteristics and Applicability of Various Probability Distributions for Wind Energy Applications. S. Eskinazi and D. E. Cramer, *Syracuse University* (JE **6**, 6, p. 384) Article

E82-070 Impacts of Broadened-Specification Fuels on Aircraft Turbine Engine Combustors. D. W. Bahr, *General Electric Company* (JE **6**, 6, p. 392) Article

E82-071 Approach to Nitinol Power Plant Cost Analysis. J. L. McNichols Jr., *McDonnell Douglas Astronautics Company*; J. S. Cory, *Cory Laboratories*; and E. H. Curtis, *Bureau of Reclamation* (JE **6**, 6, p. 399) Article

E82-072 Aerodynamic Loads and Performance of the Darrieus Rotor. Ion Paraschivoiu, *Institu de Recherche d'Hydro-Quebec (Canada)* (JE **6**, 6, p. 406) Article based on AIAA Paper 81-2582

E82-073 Developing Technologies for Synthetic Fuels. F. B. Sprow, *Exxon Research and Engineering Company* (JE **6**, 6, p. 413) Article based on AIAA Paper 81-0836

E82-074 Loading Schemes for a 50 MW_{th} Diagonally Connected MHD Generator. C. C. P. Pian and A. M. Demirjian, *Avco Everett Research Laboratory, Inc.* (JE **6**, 6, p. 418) Article

E82-075 Effect of Oxygen Addition on Ignition of Aero-Gas Turbine at Simulated Altitude Facility. N. K. Chen, Y. H. Zhao, S. S. Wu and Q. S. Zhao, *Beijing Institute of Aeronautics and Astronautics (China)*; and J. S. Chin, *Purdue University* (JE **6**, 6, p. 425) Article based on AIAA Paper 81-1471

E82-076 Performance of the Wells Turbine at Starting. S. Raghunathan and C. P. Tan, *Queen's University of Belfast* (JE **6**, 6, p. 430) Technical Note

E82-077 Solar Cell Performance at Low Illumination and Temperature for Deep-Space Applications. Ann F. Whitaker and Sally A. Little, *NASA Marshall Space Flight Center*; Carol J. Rives and Peter E. Wagner, *University of Alabama* (JE **6**, 6, p. 431) Technical Note based on AIAA Paper 81-0695

E82-078 Performance Predictions for Confined Swirling Flows. Thomas P. Opar and Ta-Ming Fang, *Boston University*; and James M. Edmann, *Pittsburgh Energy Technology Center* (JE **6**, 6, p. 434) Technical Note

E82-079 Simple Analysis of a Forced Flow Solar Regeneration System. Palanichamy Gandhidasan, *University of the West Indies* (JE **6**, 6, p. 436) Technical Note

E82-080 End Region Effects Upon the Performance of a Magnetohydrodynamic Channel. S. Y. Wang and J. Marlin Smith, *NASA Lewis Research Center* (JE **6**, 6, p. 438) Technical Note based on AIAA Paper 82-0325

E82-081 Characteristic Time Ignition Model Extended to an Annular Gas Turbine Combustor. J. E. Peters and A. M. Mellor, *Purdue University* (JE **6**, 6, p. 439) Technical Note
